INTERMEDIATE PATH | WORKBOOK

AI Projects, Content & Automation

Print it, write in it, keep it. Your lab notes, test logs and reflections for all 20 days.

About me

Name: _____ Phone: _____

What I do now: _____

Why I joined this course:

My three goals for these four weeks:

Tools and accounts checklist

Tool	Installed / created	2-step on	Notes
AI assistant accounts (2)			
Google Workspace (Sheets, Forms, Gmail)			
Automation tool account			
Canva / CapCut			
Looker Studio / Notion or Trello			

How to use this workbook

Each day has two pages. Page one is for the lab: write your prompts, record results and notes. Page two is for review: questions, reflection and homework. Use a pen. Write messy notes: this is your thinking space.

Progress tracker

Week	Deliverable	Done
Week 1	Prompt playbook (15 prompts), brand voice guide, 2-week content pack	
Week 2	3 working automations with documentation	
Week 3	Data insight report, customer assistant, service offer and pitch	
Week 4	Capstone solution, documentation, demo and portfolio	

Week 1: Advanced Prompting and the Content Engine

Goal: Get consistent, professional quality from AI and run a repeatable content workflow.

Deliverable: Prompt playbook (15 prompts), brand voice guide, 2-week content pack

My target for this week:

Weekly checklist

[ ] Day 1: Advanced prompting techniques

[ ] Day 2: Prompt chains and brand voice

[ ] Day 3: Research and strategy with AI

[ ] Day 4: Visual and video content

[ ] Day 5: Lab day: 2-Week Content Pack

At the end of the week I will show:

Day 1: Advanced prompting techniques

Objectives

[ ] Use few-shot examples, constraints and step-by-step instructions to improve results

[ ] Request structured outputs such as tables and checklists

[ ] Use self-critique loops to raise quality

[ ] Build a personal prompt playbook with tested prompts

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Choose five real tasks (a reply, a summary, a product description, a plan, an announcement) and write your current prompt for each

[ ] **Step 2.** Rewrite each prompt with examples, constraints and a required structure

[ ] **Step 3.** Run old and new versions side by side and score both from 1 to 5 on accuracy, tone and usefulness

[ ] **Step 4.** Add a self-critique step to the two weakest results and re-score

[ ] **Step 5.** Test the best three prompts twice more with different inputs to check consistency

[ ] **Step 6.** Record your winners in the Prompt Playbook table

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 1 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What is few-shot prompting?

Q2. Name three useful constraints.

Q3. What does a self-critique prompt do?

Q4. Why run a prompt several times?

Q5. What goes into a prompt playbook entry?

Words I learned today (write the meaning in your own words)

Word	My meaning
Few-shot	
Constraint	
Self-critique	
Playbook	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Add 3 prompts to your playbook.

Done? [ ] How it went:

Day 2: Prompt chains and brand voice

Objectives

[ ] Break large tasks into prompt chains

[ ] Create a brand voice guide the AI can follow

[ ] Build reusable prompt templates with variables

[ ] Produce content in a consistent voice across several formats

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Collect five real messages or posts from a business (yours, a friend's or a local shop) and underline what makes them sound like that business

[ ] **Step 2.** Write the brand voice guide using the template

[ ] **Step 3.** Build a four-step chain: research, outline, draft, edit and run it for one topic

[ ] **Step 4.** Save the chain as a template with [variables]

[ ] **Step 5.** Use one core message to produce an email, a WhatsApp message, a caption and a poster headline

[ ] **Step 6.** Compare outputs against the guide and fix anything that does not sound right

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 2 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What is a prompt chain?

Q2. Why is chaining useful?

Q3. What goes in a brand voice guide?

Q4. Why use variables in templates?

Q5. What must you check across formats?

Words I learned today (write the meaning in your own words)

Word	My meaning
Prompt chain	
Brand voice	
Template	
Core message	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Collect 5 samples of a brand's real writing.

Done? [ ] How it went:

Day 3: Research and strategy with AI

Objectives

[ ] Run a structured market and competitor research workflow

[ ] Create customer personas based on evidence

[ ] Verify AI research with real sources and real customers

[ ] Write a two-page strategy brief

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Write your research question and the decision it supports

[ ] **Step 2.** Ask AI for a market map and list the five claims that matter most

[ ] **Step 3.** Verify at least three claims using real sources and mark each as confirmed, wrong or unknown

[ ] **Step 4.** Build a competitor table for four competitors from your own observation

[ ] **Step 5.** Interview two real people for ten minutes and write down their exact words

[ ] **Step 6.** Produce a two-page strategy brief with two personas and mark unverified items

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 3 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. Why treat AI research as hypotheses?

Q2. What should a competitor table compare?

Q3. What is a persona?

Q4. Why interview real customers?

Q5. How long should a strategy brief be?

Words I learned today (write the meaning in your own words)

Word	My meaning
Hypothesis	
Persona	
Competitor	
Differentiator	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Interview one real customer for 10 minutes.

Done? [ ] How it went:

Day 4: Visual and video content

Objectives

[ ] Write effective image prompts for consistent brand visuals

[ ] Design carousels, posters and thumbnails in Canva

[ ] Produce a short video from script to captions

[ ] Follow ethics and licence rules for AI visuals

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Write the visual brand sheet: colours, fonts, image style and three example prompts

[ ] **Step 2.** Generate a set of five images that match the style and select the best three

[ ] **Step 3.** Design a seven-slide carousel in Canva with hook, value slides and call to action

[ ] **Step 4.** Design a poster and a thumbnail from the same message

[ ] **Step 5.** Write a 35-second script and shot list, film it, add captions and export

[ ] **Step 6.** Review all pieces against the brand sheet and the ethics checklist

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 4 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What makes visuals look consistent?

Q2. What are the parts of a carousel?

Q3. Why add captions to video?

Q4. What should come in the first three seconds?

Q5. When must you not use an AI image?

Words I learned today (write the meaning in your own words)

Word	My meaning
Carousel	
Thumbnail	
Shot list	
Brand sheet	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Post and measure views for 3 days.

Done? [ ] How it went:

Day 5: Lab day: 2-Week Content Pack

Objectives

[ ] Batch-produce a two-week content calendar with finished posts

[ ] Apply a quality checklist to every piece

[ ] Schedule or publish and plan measurement

[ ] Present your content pack

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Review your strategy brief and write the three themes and the success measures

[ ] **Step 2.** Build the 14-day calendar table with date, theme, format, caption, visual and status

[ ] **Step 3.** Batch all captions, then all graphics, then the videos

[ ] **Step 4.** Run the quality checklist on every piece and fix errors

[ ] **Step 5.** Swap packs with a partner for a second check using the checklist

[ ] **Step 6.** Present your pack in two minutes: audience, themes, three best pieces and how you will measure

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 5 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What is batching?

Q2. Name three checklist items.

Q3. Why decide measures before publishing?

Q4. What should you do after two weeks?

Q5. Why have a second person check?

Words I learned today (write the meaning in your own words)

Word	My meaning
Batching	
CTA	
Engagement	
Status	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Present the pack in 2 minutes.

Done? [ ] How it went:

Week 2: Automation and Productivity Systems

Goal: Connect tools so repetitive work runs by itself, with AI inside the workflow.

Deliverable: 3 working automations with documentation

My target for this week:

Weekly checklist

[ ] Day 6: Automation thinking

[ ] Day 7: AI inside automations

[ ] Day 8: Document and data workflows

[ ] Day 9: Messaging and customer workflows

[ ] Day 10: Lab day: Automation Showcase

At the end of the week I will show:

Day 6: Automation thinking

Objectives

[ ] Explain triggers, actions, filters and data mapping

[ ] Spot good automation opportunities with the 'do it three times' rule

[ ] Build a simple form-to-sheet-to-email automation

[ ] Think about reliability, errors and security

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Choose a real repetitive task and draw its current process on paper

[ ] **Step 2.** Mark each step manual, decision or automatable and estimate weekly time

[ ] **Step 3.** Create a Google Form and linked Sheet with five fields

[ ] **Step 4.** Build an automation: new form response -> add row -> send confirmation email with data mapped from the form

[ ] **Step 5.** Test with five sample entries including an empty field and note what breaks

[ ] **Step 6.** Add an error notification and write a three-line description of the automation

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 6 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What starts an automation?

Q2. What is data mapping?

Q3. What is the 'do it three times' rule?

Q4. Why draw the process first?

Q5. Why add error notifications?

Words I learned today (write the meaning in your own words)

Word	My meaning
Trigger	
Action	
Mapping	
Workflow	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Document 5 processes you could automate.

Done? [ ] How it went:

Day 7: AI inside automations

Objectives

[ ] Add an AI step with a prompt template to an automation

[ ] Use AI to classify, summarise and draft inside a workflow

[ ] Design human-in-the-loop approvals

[ ] Test with realistic sample data

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Write 20 sample customer messages with different types, mistakes and tones

[ ] **Step 2.** Write the classification prompt with fixed categories and an 'other' fallback

[ ] **Step 3.** Build the workflow: form or email trigger -> AI classify -> router by category

[ ] **Step 4.** For 'question' and 'order' categories add an AI draft reply step using your brand voice guide

[ ] **Step 5.** Add an approval email to the manager with the draft; send the reply only after approval

[ ] **Step 6.** Run all 20 samples, record accuracy and fix the prompt until at least 17 are correct

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 7 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. Name three jobs for an AI step.

Q2. Why use fixed categories?

Q3. What is human in the loop?

Q4. What should the AI do when unsure?

Q5. Why test with messy messages?

Words I learned today (write the meaning in your own words)

Word	My meaning
Classification	
Router	
Approval step	
Fallback	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Test with 10 sample entries.

Done? [ ] How it went:

Day 8: Document and data workflows

Objectives

[ ] Extract data from emails and documents into a sheet

[ ] Generate documents such as invoices and reports automatically

[ ] Build a scheduled weekly report with an AI summary

[ ] Handle errors and missing data

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Prepare 20 sample order emails or messages with varying formats

[ ] **Step 2.** Write an extraction prompt returning name, product, quantity, date and 'not found' for missing data

[ ] **Step 3.** Build the workflow to add each extracted order to a Sheet

[ ] **Step 4.** Create an invoice template and generate three PDF invoices from sheet rows

[ ] **Step 5.** Build a weekly report: schedule -> read rows -> calculate totals -> AI summary -> email

[ ] **Step 6.** Test with missing and duplicate data and add an errors sheet and run log

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 8 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. Why allow 'not found'?

Q2. Who should calculate totals?

Q3. What triggers a weekly report?

Q4. What is an errors sheet for?

Q5. What should the AI summary describe?

Words I learned today (write the meaning in your own words)

Word	My meaning
Extraction	
Placeholder	
Schedule trigger	
Run log	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Run it for a week with fake data.

Done? [ ] How it went:

Day 9: Messaging and customer workflows

Objectives

[ ] Explain messaging platform workflows and consent rules

[ ] Design a lead capture and follow-up sequence

[ ] Use the WhatsApp Business tools and Cloud API concepts safely

[ ] Write consent wording and opt-out handling

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Map your lead process: enquiry, acknowledgement, qualification, quote, follow-up, close

[ ] **Step 2.** Write six message templates: acknowledgement, quote, reminder, thank-you, away, opt-out confirmation

[ ] **Step 3.** Write the consent wording for your form and an opt-out reply

[ ] **Step 4.** Build the Sheet-based lead tracker with status and next action columns

[ ] **Step 5.** Simulate the flow using form, Sheet and email steps; add a two-day reminder

[ ] **Step 6.** Review the sequence against the consent and tone checklist and swap with a partner for feedback

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 9 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What must you collect before messaging customers?

Q2. What must you do when someone replies STOP?

Q3. Why use templates?

Q4. Why limit follow-ups?

Q5. Name one data protection principle.

Words I learned today (write the meaning in your own words)

Word	My meaning
Consent	
Opt-out	
CRM	
Data minimisation	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Write the customer consent wording.

Done? [ ] How it went:

Day 10: Lab day: Automation Showcase

Objectives

[ ] Finalise three automations with documentation

[ ] Troubleshoot and monitor workflows

[ ] Write a one-page how-to for each automation

[ ] Present your automation showcase

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Choose your three best automations and write an owner and success measure for each

[ ] **Step 2.** Run the hardening checklist and fix every gap

[ ] **Step 3.** Test each with ten sample cases including bad data

[ ] **Step 4.** Swap with a partner who tries to break your automations and records results

[ ] **Step 5.** Write a one-page how-to with a diagram for each automation

[ ] **Step 6.** Present a three-minute showcase with time saved per week

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 10 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What is the first step in troubleshooting?

Q2. Why change one thing at a time?

Q3. What belongs in a how-to?

Q4. Why include numbers in a showcase?

Q5. Why have an owner?

Words I learned today (write the meaning in your own words)

Word	My meaning
Hardening	
Run history	
Handover	
Showcase	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Prepare a 3-minute demo.

Done? [ ] How it went:

Week 3: AI for Business and Freelancing

Goal: Analyze data, build customer-facing assistants and package services you can sell.

Deliverable: Data insight report, customer assistant, service offer and pitch

My target for this week:

Weekly checklist

[ ] Day 11: Data analysis with AI

[ ] Day 12: Dashboards and reporting

[ ] Day 13: Customer support and sales assistants

[ ] Day 14: Freelancing and service packaging

[ ] Day 15: Lab day: Pitch and Proposal

At the end of the week I will show:

Day 11: Data analysis with AI

Objectives

[ ] Clean and analyse a business dataset with AI help

[ ] Create charts and plain-language insights

[ ] Verify AI calculations with formulas

[ ] Write three evidence-based recommendations

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Obtain a sample sales dataset of at least 200 rows (provided or from a willing business with personal data removed)

[ ] **Step 2.** List every data quality problem you find and clean them on a copy, recording each step

[ ] **Step 3.** Write five business questions and use AI to suggest how to answer each in the sheet

[ ] **Step 4.** Build pivot tables or formulas for each question and check three results by hand

[ ] **Step 5.** Create three charts with insight titles

[ ] **Step 6.** Write three recommendations with evidence, expected benefit and a test

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 11 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. Why work on a copy of the data?

Q2. Who should do the arithmetic?

Q3. What should a chart title say?

Q4. Name two data problems to clean.

Q5. Why state limits?

Words I learned today (write the meaning in your own words)

Word	My meaning
Dataset	
Pivot table	
Insight	
Correlation	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Find a dataset in your own work or community and analyze.

Done? [ ] How it went:

Name: _____

Day 12: Dashboards and reporting

Objectives

[ ] Build a live dashboard from a Google Sheet

[ ] Choose KPIs that matter for a small business

[ ] Write an executive summary a manager will read

[ ] Share a report safely

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Define five KPIs with definition, source and target in a KPI table

[ ] **Step 2.** Prepare the Sheet as a clean data source with consistent columns

[ ] **Step 3.** Create the dashboard with scorecards, a trend chart, a breakdown and a date filter

[ ] **Step 4.** Review layout and test on a phone

[ ] **Step 5.** Write the six-sentence executive summary and check every figure

[ ] **Step 6.** Set sharing to named viewers only and test what a viewer can and cannot see

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 12 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What is a KPI?

Q2. What belongs in a KPI definition?

Q3. Where should the most important number go?

Q4. What does an executive summary contain?

Q5. How should you share a dashboard?

Words I learned today (write the meaning in your own words)

Word	My meaning
KPI	
Scorecard	
Data source	
Executive summary	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Share it with a real business owner for feedback.

Done? [ ] How it went:

Day 13: Customer support and sales assistants

Objectives

[ ] Build an FAQ and support assistant from a business's own documents

[ ] Write tone, escalation and 'I do not know' rules

[ ] Test with tricky and adversarial questions

[ ] Plan handover to a human

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Interview a business owner (or use the trainer's case) and collect ten FAQs, the price list, hours, delivery and returns policy

[ ] **Step 2.** Create the clean knowledge document with a date and owner

[ ] **Step 3.** Write the assistant's instructions including must-never rules and escalation triggers

[ ] **Step 4.** Create the assistant in your chosen tool and add the knowledge document

[ ] **Step 5.** Test it with 25 questions and record pass or fail for each

[ ] **Step 6.** Improve instructions and knowledge until at least 22 pass and show the owner

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 13 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What should the knowledge document be?

Q2. What must the assistant do when it does not know?

Q3. Name two things it must never do.

Q4. What should trigger escalation?

Q5. Why does the owner test it?

Words I learned today (write the meaning in your own words)

Word	My meaning
FAQ	
Escalation	
Knowledge file	
Guardrail	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Collect 10 real FAQs from a local business.

Done? [ ] How it went:

Name: _____

Day 14: Freelancing and service packaging

Objectives

[ ] Choose a niche and package AI services for local and online clients

[ ] Price services in KES and USD using value and effort

[ ] Write a proposal and a portfolio page

[ ] Reach first prospects respectfully

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Write your niche sentence: I help [who] to [achieve what] by [how]

[ ] **Step 2.** Design three packages with deliverables, timeline, revisions and price in KES and USD

[ ] **Step 3.** Write a one-page proposal template with a pricing table and terms

[ ] **Step 4.** Create a portfolio page or Canva presentation with one case study from your work this course

[ ] **Step 5.** Write a platform profile and two personalised proposals for real job posts or local businesses

[ ] **Step 6.** Role-play a five-minute client conversation with a partner and record the questions you could not answer

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 14 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. Why choose a niche?

Q2. How many packages should you offer?

Q3. What belongs in a proposal?

Q4. How do you build proof with no clients?

Q5. Why personalise proposals?

Words I learned today (write the meaning in your own words)

Word	My meaning
Niche	
Package	
Proposal	
Pilot	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Send 3 real proposals or outreach messages.

Done? [ ] How it went:

Day 15: Lab day: Pitch and Proposal

Objectives

[ ] Handle a discovery call and objections

[ ] Present an offer clearly and confidently

[ ] Deliver and invoice professionally

[ ] Record a 90-second pitch

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Prepare ten discovery questions and a note-taking template

[ ] **Step 2.** Role-play a discovery call in pairs for ten minutes each and swap

[ ] **Step 3.** Write answers to the four common objections in your own words

[ ] **Step 4.** Create your scope-of-work and invoice templates

[ ] **Step 5.** Rehearse and record a 90-second pitch and watch it back

[ ] **Step 6.** Give your partner feedback using strength, question, idea and choose one local business to contact this week

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 15 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What do you do first on a discovery call?

Q2. How should you treat objections?

Q3. What must be agreed before starting?

Q4. What are the four parts of a pitch?

Q5. Why ask for a testimonial?

Words I learned today (write the meaning in your own words)

Word	My meaning
Discovery call	
Objection	
Scope of work	
Testimonial	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Contact one local business.

Done? [ ] How it went:

Week 4: Capstone: Client Project Sprint

Goal: Deliver a complete, professional AI solution for a real or simulated client.

Deliverable: Capstone solution, documentation, demo and portfolio

My target for this week:

Weekly checklist

[ ] Day 16: Discovery and project plan

[ ] Day 17: Build sprint 1

[ ] Day 18: Build sprint 2

[ ] Day 19: Polish and portfolio

[ ] Day 20: Demo Day and graduation

At the end of the week I will show:

Day 16: Discovery and project plan

Objectives

[ ] Choose a client and agree a clear project brief

[ ] Write a two-page project plan with scope, timeline and measures

[ ] Identify risks and data protection requirements

[ ] Confirm the plan with the client

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Choose your client and project type and arrange a discovery meeting

[ ] **Step 2.** Hold the discovery meeting using your question list and write the brief in the client's words

[ ] **Step 3.** Define success measures, deliverables and what is out of scope

[ ] **Step 4.** Create a milestone plan with dates and a buffer

[ ] **Step 5.** Write a risk list with a response for each and a data protection note

[ ] **Step 6.** Send the two-page plan to the client and record their confirmation

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 16 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What should a brief include?

Q2. Why measurable success?

Q3. What if a client cannot be found?

Q4. Why have a buffer?

Q5. What should happen to test data at the end?

Words I learned today (write the meaning in your own words)

Word	My meaning
Brief	
Milestone	
Out of scope	
Risk	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Confirm plan with client.

Done? [ ] How it went:

Day 17: Build sprint 1

Objectives

[ ] Prioritise a minimum viable solution

[ ] Build the core workflow or content system

[ ] Use daily stand-ups and mentor checkpoints

[ ] Document as you build

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Write the essential list and the nice-to-have list and agree the essential list with your mentor

[ ] **Step 2.** Set up your board and the folder structure for the project

[ ] **Step 3.** Build the core of the solution in two 90-minute cycles with a test after each

[ ] **Step 4.** Hold the stand-up and mid-day mentor check and record the feedback

[ ] **Step 5.** Fix the top three issues found

[ ] **Step 6.** Update the build log and send the client a short progress message with a screenshot or sample

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 17 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What is a minimum viable solution?

Q2. How long should you struggle before asking for help?

Q3. What goes in a stand-up?

Q4. Why keep a build log?

Q5. Why show the client early?

Words I learned today (write the meaning in your own words)

Word	My meaning
MVP	
Stand-up	
Build log	
Cycle	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Prepare questions for mentor.

Done? [ ] How it went:

Day 18: Build sprint 2

Objectives

[ ] Test with realistic inputs and edge cases

[ ] Handle errors and write clear user instructions

[ ] Complete the solution and get client feedback

[ ] Run a safety and privacy check

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Create a test table with at least 25 realistic inputs including five edge cases

[ ] **Step 2.** Run all tests and mark pass or fail; fix the top issues and retest

[ ] **Step 3.** Add error handling for at least three edge cases

[ ] **Step 4.** Write the user instructions and test them with a person who has never seen the project

[ ] **Step 5.** Run the safety and privacy checklist and fix gaps

[ ] **Step 6.** Send the client the current version for feedback with two specific questions

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 18 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. Name four kinds of test input.

Q2. What is an edge case?

Q3. How do you test user instructions?

Q4. What should you check for privacy?

Q5. Why state limits to the client?

Words I learned today (write the meaning in your own words)

Word	My meaning
Edge case	
Graceful failure	
Pass rate	
User guide	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Collect client feedback.

Done? [ ] How it went:

Day 19: Polish and portfolio

Objectives

[ ] Write a case study with problem, solution and measurable results

[ ] Build a portfolio page

[ ] Prepare your demo and handover pack

[ ] Collect a testimonial and next-steps agreement

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Write the one-page case study with three measurable results

[ ] **Step 2.** Create the portfolio page with introduction, case studies, packages and contact

[ ] **Step 3.** Assemble the handover folder and check that no secrets are included

[ ] **Step 4.** Run the demo twice with a timer and prepare a backup recording

[ ] **Step 5.** Hold a handover session with the client and agree the support terms

[ ] **Step 6.** Ask for a testimonial and a referral and record the response

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 19 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. What are the four parts of a case study?

Q2. Why use numbers?

Q3. What goes in a handover pack?

Q4. Why ask permission to publish?

Q5. What should you offer after delivery?

Words I learned today (write the meaning in your own words)

Word	My meaning
Case study	
Portfolio	
Handover pack	
Referral	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Rehearse demo.

Done? [ ] How it went:

Day 20: Demo Day and graduation

Objectives

[ ] Deliver a ten-minute demo with confidence

[ ] Answer questions from business guests honestly

[ ] Give and receive feedback with a scorecard

[ ] Plan your first 90 days after graduation

Warm-up: one thing I tried since last class

Lab steps: tick each step and write notes

[ ] **Step 1.** Do a technical check and rehearse the demo with the timer

[ ] **Step 2.** Deliver your ten-minute demo to the audience

[ ] **Step 3.** Answer at least two questions from the guests

[ ] **Step 4.** Score two other demos using the five-criteria scorecard and give spoken feedback

[ ] **Step 5.** Complete your reflection and the course feedback form

[ ] **Step 6.** Write your 90-day plan and share it with an accountability partner

Test log: problems I found today

Problem	My guess at the cause	What fixed it

Template notes (what each part does, in my own words)

Day 20 review

Check your understanding

Answer in your own words, then compare with your notes and templates.

Q1. How should a ten-minute demo be split?

Q2. What do you say if you do not know?

Q3. Name two scorecard criteria.

Q4. How should you give feedback?

Q5. What should your 90-day plan include?

Words I learned today (write the meaning in your own words)

Word	My meaning
Demo Day	
Scorecard	
Accountability	
Referral	

Reflection

Today I am proud that:

The hardest part was:

One thing I will use this week:

Homework / challenge

Deliver the project to your client.

Done? [ ] How it went:

Capstone plan

Capstone canvas

Question	My answer
Client and contact	
Problem (in their words)	
Deliverables and out of scope	
Success measures	
Top 3 risks and responses	
Milestones and dates	

Template and prompt notebook

Write down prompts and templates you want to reuse.

Name	Prompt or template	Works? (1-5)

Feedback log

Record feedback from classmates and mentors.
